Security Council Subcommittee
Resolution 1643 on Global Liberation Army (GLA)
Report to Security Council: Progress Report (SIT REP) on GLA Activities
Distribution classified
Location: Kavir Desert, Iran.

The GLA troops, which had escaped from Baikonur before the United States attacked the Cosmodrome, spread throughout the Middle East. US military bases dating from the first Gulf War, 43 years ago, were recovered by local governments after the mysterious disappearance of American equipment and soldiers. US forces, though equipped with NBC level 4 combinations, were reportedly the first victims of the new GLA biological weapon, the Delta-Anthrax.

Experts are concerned about this new version, classified by the CDC as the first level 5 pathogen. This strain, which may have been developed by Dr Thrax, would have been obtained through genetic manipulation of the pertussis bacillus and tuberculosis to transform anthrax into a highly contagious disease. The alarming CIA reports are all converging towards an intercontinental missile launch base that would be equipped with Delta-Anthrax heads. The GLA reportedly bought Soviet military technology developed during the Cold War on the black market. Indeed, Russia never recovered from the exhaustion of its oil resources in 2026 and made the sale of clandestine weapons the main engine of its economy in full implosion. Chinese intelligence has retrieved sensitive information on the GLA's internet servers. Although the Chinese hackers could not hack the encryption, a series of recurrent data '34 ° 28 '36 N / 54 ° 21' 43 E ' in the files strangely resembles the coordinates of the great Iranian desert, Kavir. China suspects the desert to shelter an underground base buried under the sand.

The Iranian government, in the rotating presidency of the Middle East Consortium (MEC), currently controls 70% of the reserves and 80% of the world's oil production. The new president, Koreichi, who has just been elected head of the Democratic Republic of Iran, warned the United States against any interference or military intervention on its land, threatening to stop the export of oil. Koreichi, who denies any relationship with the GLA, is part of a blacklist set up by the CIA of secret sympathizers and affiliates of the GLA. The list would include thousands of names of politicians, military and Middle Eastern leaders, including General Badruddin. We have very little information about this former Commander-in-Chief of the Iraqi army who suddenly disappeared without leaving any traces. According to sources close to the CIA, he was recruited by the head of the GLA in person to lead a new cell called «Black Widow».

If the CIA's information proves to be accurate, the GLA is more than ever a threat to the future of the free world. No one can imagine the magnitude of his response in the event of military intervention.

The subcommittee recommends that the Security Council keep the door open to discussions with the GLA, in order to find a vaccine against the Delta Anthrax and infiltrate the organization to discover the hierarchy of this mysterious organization.

General Franklin Williams

Tomahawk General USA

General Williams won the respect and the admiration of the entire world during his decisive victory in the Baikonur crisis.

The GLA, caught between a rain of Tomahawk missiles and the armored divisions, had no choice but to escape before the arrival of the Chinese reinforcements.

The GLA was caught short when this brilliant strategist bypassed the land defenses and destroyed the cosmodrome with the new state-of-the-art Tomanche helicopters.

Ever since he declared in the television press «empathize» with the sufferings of his enemies, he is nicknamed «the empathic» by his peers. Williams is a proponent of the war

of attrition, preferring to weaken his enemies at a distance before sending his troops to finish them.

General Malcolm «Ace» Granger

Air Force General USA

General Granger plays a crucial role in the Middle East crisis on the horizon.

It is not by chance that the Americans suspect Kavar of housing an underground military base.

Indeed, this marshy desert, with a daily thermal amplitude of 60°C, is surrounded by three mountainous chains.

The United States cannot envisage a ground attack on such a difficult terrain, they would be an easy prey for the GLA.

US aviation, out of reach of biological weapons, is a strategic option of choice.

Granger is running a top secret military program titled «Desert Storm» designed to mobilize thousands of stealth bombers equipped with sufficient loads to scratch from the map 50,000 Km² in 24 hours at 20 meters underground depth.

His latest invention, the Delta-Anthrax, is considered by the CDC as a threat to the survival of the entire human species.

It is hard to imagine that such a Cartesian and paranoid man has not conceived an antidote to protect him from this formidable weapon.

If the Americans came to get their hands on this miracle drug, they would have no reason to delay the war.

General Rodall «Demo» Juhziz

Demolition General GLA

Thanks to the funds he regularly receives from the «organization», General Juhziz has finally bought out an airline that owns a fleet of dozens of commercial airliners.

No one suspected at the time that these aircraft would eventually be stuffed with explosives and used by the GLA to perpetrate more devastating attacks than the others.

In 2030 he organized a concerted attack against the European Central Bank and on the headquarters of the European Union and NATO.

The Europeans, who detected the attack in time, were able to evacuate the target areas and there were no civilian casualties.

Nevertheless, the giant craters caused by its attack are still haunting the minds of people all over the globe.

Prince Kassad

Stealth General GLA

Jarmen Kell, whom the Americans believed to have shot down during the Battle of Baikonur, turned out to be a look-alike among many others.

The real Jarmen Kell would only be a myth that emerged during the American occupation of Iraq.

Prince Kassad has an army of spies, snipers, pirates, saboteurs and assassins willing to sacrifice themselves to serve his cause.

This follower of the techniques of stealth would have bought on the black market new jammers GPS sufficiently light to

equip its vehicles.
